

CENSUS OF POPULATION AND HOUSING, 30 JUNE 1966
COMMONWEALTH OF AUSTRALIA

VOLUME 1.
POPULATION: SINGLE CHARACTERISTICS

PART 1. AGE

Prepared under Instructions from the Right Honourable the Treasurer by

J. P. O'NEILL

ACTING COMMONWEALTH STATISTICIAN

COMMONWEALTH BUREAU OF CENSUS AND STATISTICS

CANBERRA, AUSTRALIA

P R E F A C E

The 1966 Census publication programme is made up of six individual Volumes, each consisting of a number of separate Parts, together with a series of supplementary statements in mimeographed form. The actual titles of the 1966 Census Volumes and Parts are listed in the back of this publication; the content of each is briefly as follows:

- Volume 1. Single characteristics of the population for Australia, Parts 1-11.—Age, marital status, birthplace, nationality, period of residence, education, religion, occupational status, industry, occupation and race.
- Volume 2. Related characteristics of the population for Australia, Parts 1-5.—Growth and distribution of the population, demographic data, overseas-born population, the work force, and families and households.
- Volume 3. Housing.
- Volume 4. Single characteristics of the population and dwellings in Local Government Areas, Parts 1-7.—New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, and Northern Territory and Australian Capital Territory.
- Volume 5. Population and dwellings in localities, Parts 1-7.—States and Territories as for Volume 4, and Part 8.—Australia.
- Volume 6. Statistician's Report, Parts 1-6.—Introduction, preparation for the Census, the enumeration, processing the data, dissemination of results, and evaluation.

This publication is Part 1 of Volume 1 and contains details of the ages of the population enumerated at 30 June 1966 together with comparative data for previous Censuses.

J. P. O'NEILL
Acting Commonwealth Statistician

Commonwealth Bureau of Census and Statistics
Canberra, A.C.T. 2600. December 1969.

CONTENTS

EXPLANATORY NOTES

Significance of age statistics

Information concerning the ages of the people obtained at a population Census is of utmost importance. This information, if given adequately in a succession of censuses, permits observation of change in the average age of the population and in the proportions of the younger and older age groups. It provides a periodic check upon, and increases the value of, currently-recorded vital statistics. It yields the basic material required for the computation of nuptiality, fertility and mortality rates, of the probability of survival, and of annuity rates. Other information gained at the census, when used in conjunction with age data, takes on a significance which would otherwise be entirely lacking. Furthermore, the census provides the basis of annual estimates of the age distribution of the population which may be made between censuses with the aid of the continuous records of births, deaths and oversea migration according to age. This latter information in turn, provides an opportunity to test the accuracy of the recorded census data relating to age to an extent not possible with any other subject in the population census. A great deal of attention, therefore, has been devoted to examining the completeness and accuracy of the age data.

The form of inquiry

At the uniform censuses of the Australian Colonies or States in 1891 and 1901 and in the seven Commonwealth Censuses since, age data were presented consistently on the basis of age last birthday, calculated as at census date. At any census this information may be obtained directly by asking 'age last birthday' (as in 1891, 1901, 1933, 1947, 1954, 1961 and 1966) or indirectly by asking 'date of birth', or these two methods may be left to choice as alternatives (as in 1911), or both may be asked for all persons (as in 1921).

Throughout the Australian Censuses since 1891, there has been a trend towards the more correct stating of age. An obvious improvement in the statement of age in the 1911 Census, which was maintained in 1921, seemed to suggest that the opportunity to state date of birth had been instrumental in effecting improvement in age statements; but as the standard has been by no means lowered in subsequent Censuses when 'age last birthday' was asked, it may be concluded that there are other contributing factors. It is probable that the main reasons for this improvement are concerned with the compulsory registration of births, marriages and deaths which has operated in the several States variously from the eighteen-fifties, and provides the essential data for individual reference which are widely used; the system of free universal education which has operated throughout the lifetime of most Australian-born persons (and many oversea-born), coupled with a higher individual standard of education; and a more constant necessity in many ways for age to be stated, recorded or proved at various stages throughout life under modern social systems. Nevertheless, mis-statement of age does take place and some further information on this subject is contained below.

At the 1966 Census persons were asked to state age in accordance with the following instructions.

State age in years and completed months. If aged under one year, state age in completed months (for example, a child of eleven months should be shown as '0' years '11' months). If aged under one month, write '0' years '0' months.

This question is more specific than that asked at previous Censuses, which sought 'age last birthday' (in years). The change should overcome some mis-statement of age due to rounding. Similarly, it is expected that confusion in the reporting of ages of young children (which are conventionally thought of in 'months' up to the age of about two years) should now be largely obviated.

Completeness and accuracy of age data

Ages not stated

Prior to the 1954 Census, ages 'not stated' were tabulated as such for urban and rural sections of each State and later distributed to specific ages in accordance with the frequency of stated ages. In the 1954 and later Censuses, ages 'not stated' were individually estimated prior to tabulation by firstly establishing the minimum range of ages within which the 'not stated' age most probably lay (as indicated by other information supplied in the Householder's Schedule) and by then selecting an age from within that range from a table of random ages according to sex. This table had been compiled previously using the latest estimates of the age distribution of the population which were available at the time.

The proportion of persons who failed to state an age is very small.

Mis-statement of age

Age is a continuously changing value, and, because of this, replies to the age question are prone to mis-statement to a greater extent than questions for which the answer is constant throughout life, e.g. birthplace, or for which the answer is determined only by facts of the moment, e.g. occupation.

Compulsory registration of births has operated in Australia for over 100 years and it can be expected that documentary proof of age would be available to most Australian-born persons. Likewise, because of similar systems in other countries, particularly the United Kingdom, it would be available to most oversea-born persons who were in Australia at census date. Further documentation of age is found with the compulsory registration of marriage. While such documentation may not be used to any extent for the purpose of stating age on the Census Schedule, it may be accepted that its existence has greatly increased the ability to give a correct reply. Moreover, the circumstances of modern life, under which age is required to be proved for a variety of purposes, further increase the probability that individuals are now more likely to state age correctly.

However, age mis-statement does occur and is usually evidenced by 'heaping' of the population at ages ending in 0 or 1 (e.g. 20, 21, 30, etc.) and at the age corresponding to the year of the Census (e.g. age 66).

The actual reasons for mis-statements of age are uncertain. Some of the mis-statements are due to ignorance of correct age; some reflect carelessness combined with a more or less conscious preference for certain attractive digits, and possibly subconscious aversion to certain other numbers, which varies to some extent from census to census; and some are wilful misrepresentations arising from motives of economic, social or purely individual character. To what degree each of these factors plays its part in age mis-statement at a Census it is impossible to say from the evidence of figures alone.

The tabulated census results relating to age therefore contain mis-statements due to such causes. At censuses prior to 1954, in an attempt to eliminate the effect of mis-statement, the age distribution was graduated or smoothed. This process was undertaken at each Census up to 1947 and the graduated age distribution was published. For the purposes of this publication the recorded age distribution has been published for all Censuses except in so far as 'not stated' ages have been allocated for Censuses since 1954.

Evaluation of age data

Immediately following the 1966 Census a post-enumeration survey was held in order to estimate objectively the extent of reporting and coverage errors in the census.

Basically the survey was conducted as follows. A small sample of dwellings was selected from throughout Australia, and at each dwelling interviews were carried out to collect, in respect of a number of personal characteristics, information similar to that obtained at the Census. The use of interview as opposed to self-enumeration techniques allowed the same information to be obtained in a different and often more precise manner. Later, for each person selected in the sample, census and interview information were matched and, where significant discrepancies were found, 'correct' information was ascertained from a further follow-up interview.

Age was one of the personal characteristics selected for this evaluation study. Results from this survey are being analysed and it is expected that the results of this analysis will throw some light on the accuracy of the census data.

Population distribution

The understanding and measurement of the process of urbanisation have long been recognised as fundamentally important to considerations of economic and social change. For this reason Census information has traditionally been published separately for 'metropolitan', 'other urban', and 'rural' areas. However, the criteria used in the past for making this dissection (criteria which are still used in many countries) did not provide comparable data for different areas or for different points of time.

In Australian censuses up to and including the Census of 1947 complete local government areas were classified as either urban or rural, and 'urban' areas therefore usually consisted of whole local government areas, or multiples of them. However, many local government areas, particularly at the fringe of large urban complexes, contain both urban and rural components. In some cases it was necessary to split local government areas for statistical purposes in order to eliminate large rural expanses from the metropolitan areas. Boundaries of local government areas were also subject to variation for reasons unrelated to (and often conflicting with) statistical requirements, and consequently this method became increasingly unsatisfactory.

In the Censuses of 1954 and 1961 all localities of 1,000 population and over (750 and over in Tasmania) were classified as 'urban'. Boundaries were delineated either from local advice, inspection in the field, or from aerial photographs. However, although these procedures were an improvement on the earlier ones, the boundary decisions made for different urban centres, being highly subjective, did not always provide sufficient comparability from census to census nor between one centre and another.

Delimitation of urban centres

The principles and criteria used for the delimitation of urban centres in Australia at the 1966 Census were as follows:

A boundary was defined for all settlements with a population of 1,000 or more and these were named 'urban centres' except for the State capitals and Canberra which were named 'Metropolitan areas'. This boundary is one which, from census to census, as urbanisation proceeds, will be moved outwards to encompass any peripheral urban development.

For urban centres with a population of 30,000 and over, and for a few smaller centres, the following criteria were adopted for delimiting the urban centres.

- (a) The Metropolitan Area or urban centre was delimited by including all contiguous Census collector's districts with a population density of 500 or more persons per square mile.
- (b) Certain collector's districts, although not reaching the required population density were also included by virtue of—
 - (i) land use (e.g. factory areas),
 - (ii) being surrounded by urban collector's districts,
 - (iii) forming a 'bridge' between two urban centres less than two miles apart so that they could be regarded as one single urban centre.

For urban centres of less than 30,000 population, local government area boundaries were adopted, unless they contained a large rural component or urban development was known to extend beyond the local government boundary. In these cases they were delimited by inspection of aerial photographs, by

field inspection or by consideration of any other information available, and the boundaries were set as closely as possible to the periphery of the built-up area without regard to local government boundaries. In areas with large numbers of holiday homes, many of which are unoccupied at the mid-winter Census date, dwelling rather than population criteria were used. These criteria were 250 dwellings (in lieu of the 1,000 population mentioned above) and 125 dwellings per square mile (in lieu of the 500 persons per square mile mentioned above).

Around each metropolitan area and urban centre with a population of at least 75,000 and a regional population of at least 100,000, a further boundary was defined, designed to circumscribe an area which would contain the urban development of that centre for at least twenty years and which would generally be socially and economically oriented to the centre. These areas were designated 'Statistical Divisions' (for State capital cities) or 'Statistical Districts' (for Canberra, Newcastle, Wollongong and Geelong).

Because the new criteria for the delimitation of urban boundaries were adopted only shortly prior to the 1966 Census a few collector's districts containing urban growth were not split into their rural and (potentially) urban components, with the result that significant urban population remained included in large, predominantly rural, collector's districts, which did not meet the density criterion. Such cases occurred mainly around the Sydney Metropolitan Area and Urban Toowoomba. The effect on the Sydney Metropolitan Area is small, probably not more than 5,000 urban population having been omitted. In Toowoomba the effect is proportionately much greater, the urban population probably being understated by up to 3,000 persons.

Migratory population

The migratory population consists of persons who, at midnight between 30 June 1966 and 1 July 1966, were enumerated on board ships in Australian ports, or ships which had left an Australian port prior to Census night with a next port of call in Australia. It also includes persons, who at Census time, were enumerated on long-distance trains, motor coaches or aircraft.

General

The criteria adopted at the 1966 Census allow more reliable comparison of the population of different areas at the one point in time. However, comparison with section of State data of previous Censuses is limited because of the different bases upon which these areas were defined at the earlier Censuses. Although detailed comparison at the individual characteristic level is not possible, the population enumerated at the 1961 Census has been allocated retrospectively to each section of State on the basis of the criteria adopted for the 1966 Census, and the following table gives some indication of the differences caused by the application of the new criteria in each State. Unfortunately, it is not practicable to extend this table to show similar comparisons for Censuses prior to 1961 nor to include details of the effect of the new criteria upon population allocation to section of State according to individual characteristics.

1961 Population Allocated on 1961 and 1966 Census Criteria

State or Territory	Metropolitan			Other urban areas			Rural areas

Aborigines

All tables in this Part exclude persons who described themselves as being more than 50 per cent Aboriginal or who described themselves as being 'Aboriginal'.

NOTE. Any discrepancies between totals and sums of components in tables showing percentages are due to rounding.

No. 14.—Population, Mean and Median Ages: States and Territories, Australia, Census, 30 June 1966

State or Territory	Mean age (years)			Median age (years)		
	Males	Females	Persons	Males	Females	Persons
New South Wales	31·11	32·87	31·99	28·27	29·91	29·06
Victoria	30·65	32·45	31·55	27·59	29·15	28·35
Queensland	30·84	31·92	31·38	27·05	28·04	27·53
South Australia	30·45	32·07	31·25	26·99	28·47	27·71
Western Australia	30·14	31·08	30·60	26·42	27·12	26·76
Tasmania	29·64	30·80	30·22	25·67	26·46	26·05
Northern Territory	27·70	24·67	26·41	26·56	23·14	25·12
Australian Capital Territory	26·30	26·41	26·35	23·96	23·58	23·77
Australia	30·71	32·27	31·49	27·52	28·89	28·18

NOTE. The *mean age* is obtained by totalling the age of all the population, male, female, or both combined, and dividing by the number of each sex, or both combined as the case may be. Since in the Census returns all ages are stated as 'age last birthday', this basis understates the true mean age by approximately half a year, for on the average approximately half a year has elapsed since the birthday. An adjustment for this half a year of age has been incorporated in all mean ages shown in these tables.

The *median age* is the age (for either sex, or for both combined) where there are as many persons above that age as there are below.

TO THE DIRECTOR
OF THE UNIVERSITY OF CHICAGO
FROM THE DEPARTMENT OF CHEMISTRY
RE: [illegible]

Enclosed for the Director are two copies of a report on the work of the Department of Chemistry during the year 1964. The report is divided into two parts, one dealing with the work of the Department of Chemistry and the other with the work of the Division of the Physical Sciences.

1966 CENSUS OF POPULATION AND HOUSING PUBLICATIONS

issued by the Commonwealth Bureau of Census and Statistics

Information from the 1966 Census of Population and Housing is in three series of publications:

FIELD COUNT STATEMENTS (in mimeographed form). Contain preliminary figures compiled by field personnel during the taking of the Census. These have been superseded by the Census Bulletins.

BULLETINS (mimeographed). Contain preliminary results from the Census. All of these Bulletins have been issued and, in the list below, dates of issue are shown in italics. In most cases these Bulletins will be superseded by a corresponding Part of the printed Volumes.

The mimeographed bulletins are available in limited numbers free of charge from the Commonwealth Statistician, Canberra.

Bulletins Nos 1 to 8 were issued in separate parts for Australia, each State and Territory.

- No. 1. Summary of Population. *April 1967 to Dec. 1967.*
- No. 2. Summary of Dwellings. *June 1967 to Sept. 1969.*
- No. 3. Population: By Age and Marital Status. *Feb. 1968 to May 1968.*
- No. 4. Population: By Industry and Age. *May 1967 to June 1968.*
- No. 5. Overseas-Born Population: By Birthplace and Nationality. *May 1967 to July 1968.*
- No. 6. Population: By Industry and Occupational Status. *May 1967 to July 1968.*
- No. 7. Population: By Marital Status, Age and Occupational Status. *May 1967 to June 1968.*
- No. 8. Population and Dwellings—
 - Local Government Areas and Urban Centres (N.S.W., Vic., Qld, S.A., W.A., Tas.). *May 1968 to Mar. 1969.*
 - Police Districts (N.T.) *Aug. 1968.*
 - Administrative Divisions (A.C.T.) *June 1967.*
 - Local Government Areas, Urban Centres, etc. (Australia). *Dec. 1969.*
- No. 10. Census of the Territory of Norfolk Island. *June 1968.*
- No. 11. Census of the Territory of Christmas Island. *Oct. 1968.*
- No. 12. Census of the Territory of Cocos (Keeling) Islands. *Oct. 1968.*
- No. 13. Census of the Territory of Nauru. *Nov. 1968.*

The Aboriginal Population (Revised Statement): States and Territories of Australia. *Nov. 1967.*

The Aboriginal Population of Australia: Summary of Characteristics. *April 1969.*

VOLUMES (printed). These are now in the course of publication. There are six volumes, five of which consist of a number of separate Parts.

The titles are given below with the date of issues up to this part shown in italics. Prices and distribution arrangements are outlined below.

Vol. 1. POPULATION: SINGLE CHARACTERISTICS—

- Part 1. Age. *Sept. 1970.* 50c.
- Part 2. Marital status. *Sept. 1970.* 50c.
- Part 3. Birthplace. 50c.
- Part 4. Nationality. 50c.
- Part 5. Period of residence. 50c.
- Part 6. Educational attainment. 50c.
- Part 7. Religion. 50c.
- Part 8. Occupational status. 50c.
- Part 9. Industry. \$1.00.
- Part 10. Occupation. 50c.
- Part 11. Race. 50c.

Vol. 2. POPULATION: RELATED CHARACTERISTICS—

- Part 1. Growth and distribution of the population. 50c.

Distribution Arrangements. Printed publications may be purchased over the counter or through the post from the Director of Publications, Commonwealth Government Printing Office, Canberra, A.C.T. 2600, and the Office of the Deputy Commonwealth Statistician or the Commonwealth Sub-Treasury in each State capital; through the Publications Branch Book Counter, the Foyer, Commonwealth Centre, Sydney; the New South Wales Government Information and Sales Centre, Sydney; the Commonwealth Government Bookshop, 347 Swanston Street, Melbourne; or from booksellers. When ordering publications through the post the price including postage should be forwarded. The price over the counter is shown above for each publication (including estimated prices for unissued publications). Prices including postage are also shown for publications issued to date; air mail and overseas rates are available on application to the Director of Publications who will also arrange account, standing order or reminder service facilities if required.

* Rates respectively as follows (i) within 30 miles, (ii) elsewhere within the State, (iii) adjoining States, and (iv) elsewhere within Australia including Papua and New Guinea.
